# What have we done while learning about space?

- Visitors= Neil Armstrong, Dartmoor Zoo and a Magistrate
- We watched Tim Peake live- in space
- Entered a competition
- We changed the book corner into a space corner
- We had a parents coffee afternoon where we shared our amazing learning
- Learnt about the space race and the solar system
- We wrote biography's about Neil Armstrong
- Made power points
- Went to Plymouth Council House for our GREAT BRITISH DEBATE OFF

[Back to the beginning](#)

# What have we enjoyed and why?

We have enjoyed and why:

Learning about the planets

Because it was fun to paint and colour in the (not to scale) planets.

The Council House Debate

Because the debate was fun and lively and also because I (Anya) was part of the debate team.

Space corner

Because it was fun to blow up the planets as well as learning about them

## The next steps and why

The next steps are:

- To communicate with other schools and involve them in the debate so other pupils get the experience
- Have some more important people there so that our trips may be put in newspapers or on the internet
- More pupils and staff so younger years can join in
- An audience to join in and give their opinion that someone else might not have thought and and make lots of people change theirmind

What are we looking forward to in our future project?

We are looking forward to:

- Finding out what our new project is so we can research and learn about our project in extra time
- The trips and visitors are especially fun and educational
- Projects- DT, art because they are fun and help us in many different ways
